	Examiner Mark H. Paschall	Art Unit 3742	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1,2,7,9,10,15-18 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Gossler et al 780'. Note that paragraph 3 in column4 in Gossler et al sets forth that rotation in either of two directions, controls heat to either the first heating element or to a second heating element in addition to the first. Thus a plurality of heating zones is set forth as in claim 1 and the initial movement relative to rotatable direction is set forth as claimed.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 3-6,8,11-14,19 and 20 are rejected under 35 U.S.C. 103(a) as being unpatentable over Gossler et al 780' in view of Kornrumpf et al . Gossler et al teach the

claimed subject matter except for showing use of relays as the end control switching unit. Considering the widespread use of relays to control power to heating elements as considered a choice designated by the current levels needed, it would have been obvious to modify the Gossler et al system to use relays to supply current to the heaters, as set forth in Kornrumpf et al. Note that high current supply demands are typically met by relay control and lower current supply conditions met by semiconductor switches. As per claim 13 choice of a particular heating element shape is an obvious choice dependent on the type of cooking device used with the claimed controller. As per claim 14 use of a display is conventional in cooking system controllers and use of the same in Gossler et al as modified is a routine choice for the artisan.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Kirby and Graff are cited for disclosing pertinent heating control systems.
